CZECH PROPOSAL FOR MORE GRAIN WAREHOUSES,
BETTER USE OF MANPOWER

On Tuesday, 6 May 1952, Frantisek Krajcir, Minister of Internal Trade, presented to the government a proposal for the construction of grain warehouses to provide for warehouse space for storing grain purchased from the 1952 harvest. He reported as follows:

The measures taken by the government to increase purchases from the domestic harvest and to raise grain imports, primarily from the USSR, will guarantee not only a normal supply of flour and bread products for the entire year, but will make possible the formation of reserves which will assure supplies if the harvest in any particular year is insufficient.

Many warehouses which were previously used for grain have been taken over for other purposes. These cases must be investigated and the possibility of returning these warehouses to their original purpose ascertained. In addition, it will be necessary very soon to release all other space which can be used for grain storage. The government has decided to organize a government commission composed of the ministers of Internal Trade, Agriculture, the Interior, and the Construction Industry to carry out this task. It will be the job of the people's administration, particularly of the kraj National Committees, to give the government commission all possible help in the effort to find suitable storage space.

Jaroslav Havelka, Minister of Manpower and Vaclav Pokorny, Minister of Fuels and Power reported to the government as follows on the status of the program to provide replacements for departing brigade workers, particularly for the black-coal mines:

Recently there have been instances in which brigade workers were not released to replace those returning from the mines to their factories, offices, and other installations; this threatens to reduce output. The government has, therefore, charged all the ministries concerned with providing for the regular and timely release of brigade workers from the agencies and organizations subordinate to them. This is to be done on the basis of the detailed requirements of the Ministry of Manpower and within the prescribed time limits. All factory administrations and offices and enterprises which are told to release brigade workers must fill their quotas in time.

RESTRICTED

Similarly, on the basis of a motion by the Minister of Manpower, the government discussed and approved a regulation on the placement of graduates of institutes of higher education and of selected specialized schools. This measure is the result of the requirements of the planned development of the economy, and particularly of industry, which requires that specialized workers leaving the schools be placed according to the needs of the state economic plan and proper management of specialist personnel. Graduates of institutes of higher education and of selected specialized schools will be required to work for 3 years in enterprises, offices, courts, institutes, and other establishments which the particular ministry or subordinate agency decides on the basis of the state economic plan. The enterprises will be required to use the graduates for work for which they were trained, shall devote attention to their technical and political development, and shall provide proper housing for them.
